

# Dog House Plans

**Plywood:** 2 whole sheets of 3/4 inch (0.75") treated ply.

**2 x 4s:** You will need four (4) 8 ft. 2x4s

**Lid:** (2) 48" cuts (front & back)  
 (2) 28.5" cuts (sides) - however, size/shape of house changes with construction  
 I always attach the front and back 48" cuts, then measure for the sides.  
 It never ends up being 28.5"

**Inside:** (8) 24" cuts for the inside
