

TEK 1.0

GPS TRACKING + E-COLLAR
SPORTDOG.COM

TEK 1.0

Introducing the industry's first combination remote training and tracking system: The TEK 1.0. For hunters who run hounds for lions, bears or hogs; beagles for rabbits; or pointing dogs for upland birds, the TEK 1.0 provides GPS tracking capabilities in a compact, handheld transceiver. No external antennas required! Get an instant fix on up to 12 dogs' locations all the way out to 7 miles with just a glance at the backlit liquid crystal display screen.

The TEK 1.0 is available in two formats based on a single, unique transceiver. Collar-receivers come as separate, compact modules that fit together on a single collar strap. All components feature SportDOG Brand's DRYTEK design, so they are waterproof and submersible to 25 feet.

MODEL/TEK 1.0LT:
GPS-BASED TRACKING AND
REMOTE TRAINING SYSTEM
